

Quotes Application (part 4)

Problem Definition:

Consume the Quotes App API Endpoints and design the website.

API Endpoints:

All API endpoints are listed in a Word file “Quotes App API Endpoints.”.

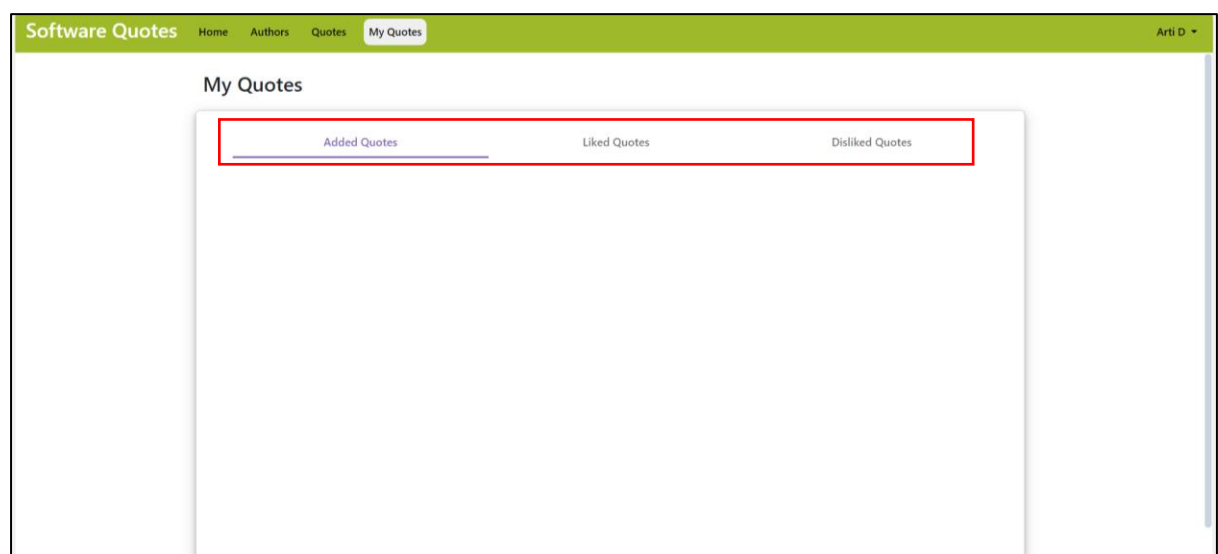

UI Screens

Below are the sample UI Screens that will consume the API Endpoints. You are free to design your screens. Provided the API endpoints are used correctly.

1. My Quotes

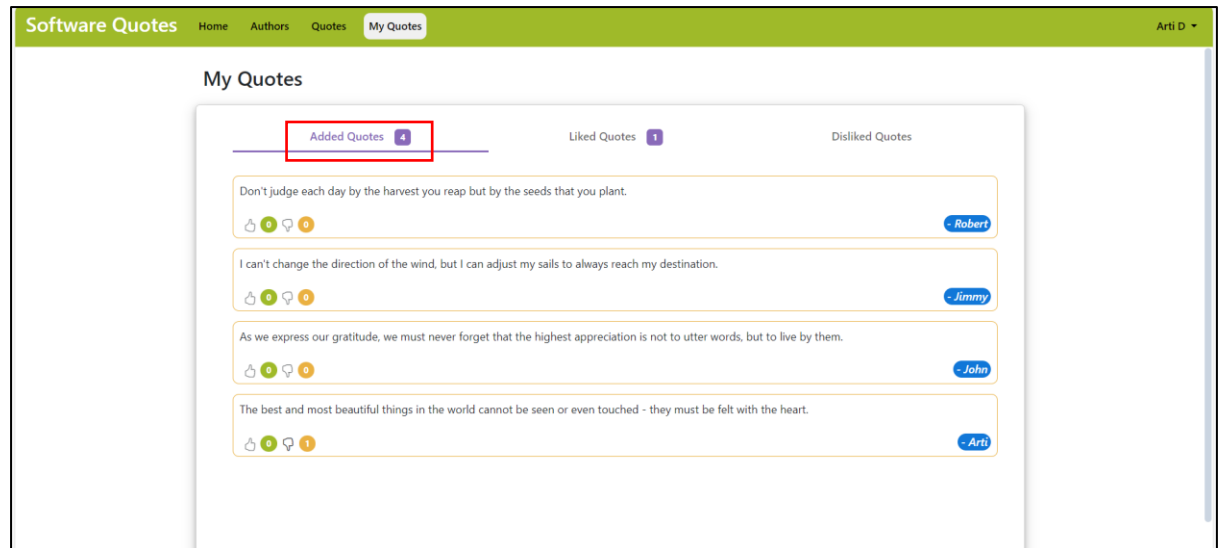

Add a menu “My quotes” to display the quotes added by the logged-in user.

Add tabs – Added Quotes, Liked Quotes, and Disliked Quotes.

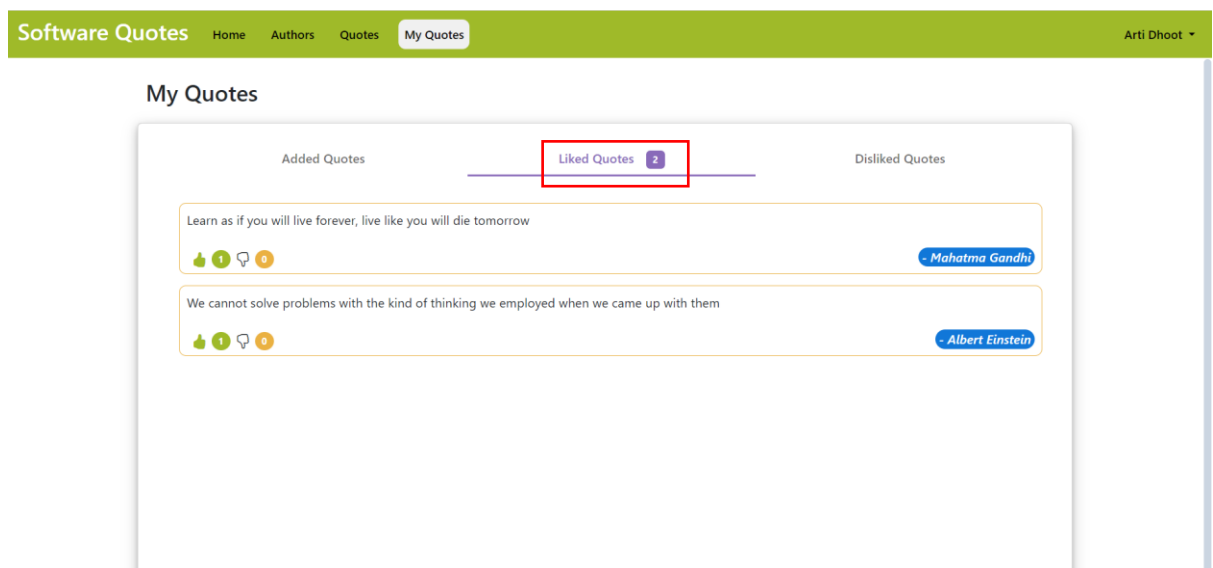

2. Tab- Added Quotes

In “Added Quotes” tab, display the quotes added by the logged-in user and display the count of the added quotes as a badge on the tab.

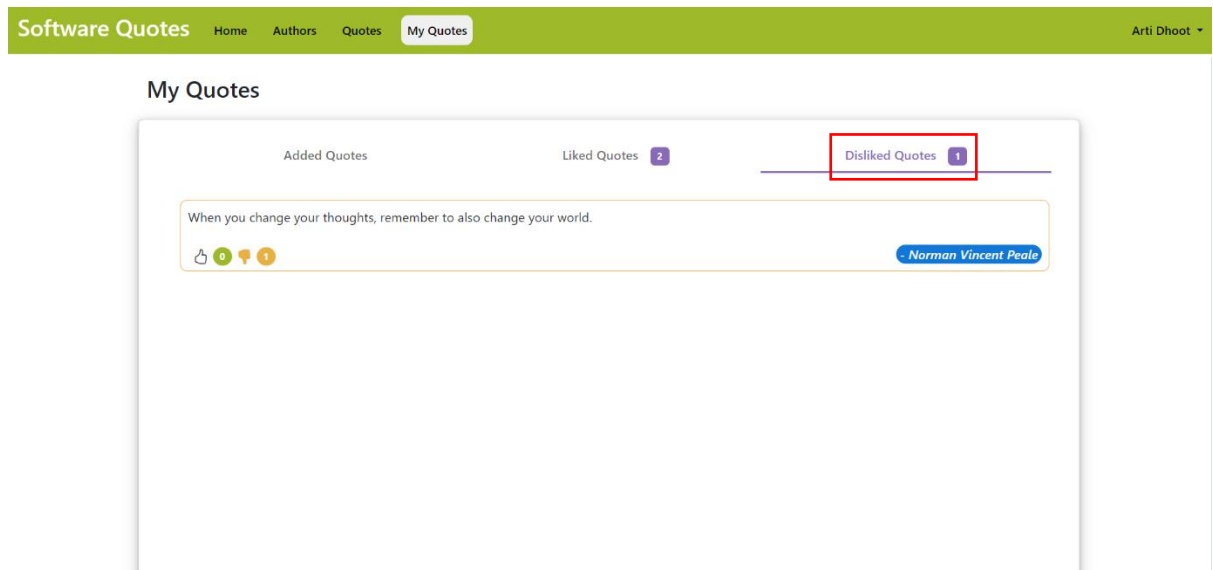

3. Tab- Liked Quotes

In “Liked Quotes” tab, display the quotes that the logged-in user has liked, and also display the total count of the liked quotes.

4. Tab- Disliked Quotes

In “Disliked Quotes” tab, display the quotes that the logged-in user has disliked, and also display the total count of the disliked quotes.

NOTE:

- Work on Each task individually, don't try to complete all the tasks together.
- You are advised to commit your changes once each task is complete and push to GitHub.
- While committing your changes put proper commit messages.
Hint: Use [Conventional commit](#) messages
